I am a seasoned Software Engineer with over 15 years of experience, specializing in the efficient development of web applications. My primary focus lies in backend development and architecture, where I have accumulated extensive hands-on expertise, enabling me to design and build robust, high-performance web solutions.

EXPERIENCE

Principal Software Engineer, Pure Storage (NYSE: PSTG)

Pure Storage develops all-flash data storage hardware and software products.

June 2023 - Present

- Enhanced the efficiency of message processing by 50%, while concurrently achieving an impressive 85% reduction in resource consumption for a critical microservice.

Senior Software Engineer, Semrush (NYSE: SEMR)

Semrush is the online visibility management and content marketing SaaS platform.

April 2018 - April 2023

- Successfully initiated the creation of ImpactHero from the ground up. ImpactHero is an AI tool designed to analyze content in alignment with buyer journey stages, pinpoint the most impactful copies, and offer actionable tips for enhancing content strategy for corporate clients.
- Spearheaded the design and construction of an efficient asynchronous backend for SEO Writing Assistant. This backend is responsible for checking user-generated text and delivering tailored recommendations. It seamlessly integrates within our platform and across key Add-ons, including Google Docs, MS Word, and WordPress.

Software Engineer, Magnit

Magnit is one of Russia's leading food retail chains, number one by the amount of stores and geographical coverage

April 2014 - April 2018

- Designed and implemented a comprehensive configuration management system for routers. This system allowed for the execution of commands on routers, firmware updates, and seamless restoration from backups in case of incorrect updates.

Software Engineer, Sberbank

Sberbank is the largest bank in Russia

November 2012 - April 2014
